Task : How to

access online  
registration link

(~~Don't~~ focus here is  
to reach the point when  
you can click on the  
link to begin registration)

Currently the process for  
existing students to reach  
page to click on link to  
register is inefficient.

Changes made:

1. Remove "I am" menu.
2. Rename "Online Services" to "MyACC"
3. Add link for Calendar in empty space at bottom right column.

Changes Made

1. Put "Prev" & "Next" on same line to  
(i) save space  
(ii) make links function intuitive
2. Changed "Apply" & "Register" to "Join ACC" - Register can attract existing students who want to register.

Changes

- ① Put login entry boxes on this page to avoid another click to reach login
- ② Make one common login vs separate for student, faculty, etc. & programmatically determine classification
- ③ Show links to helpful info on each visit (versus only 1st visit as it is currently).
